

Shapers **of the future.**

**5.0**

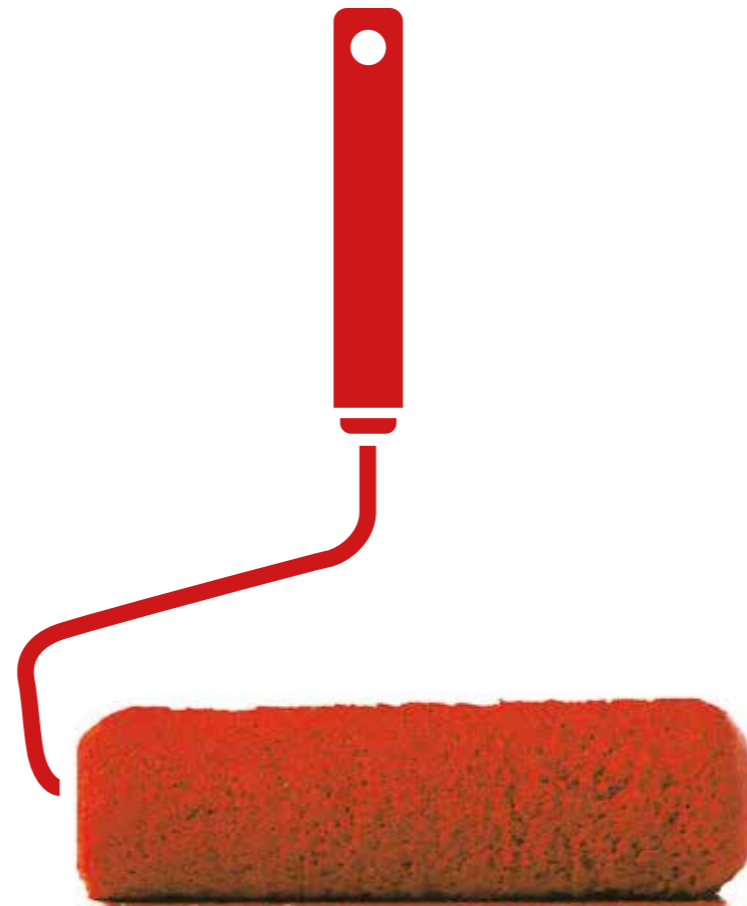

Company profile

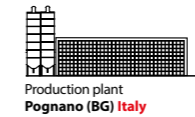

For over three decades, **LicataFIP Chemicals** has been synonymous with excellence in the construction industry, driven by a constant commitment to quality.

Since our foundation in the 1980s, we have established ourselves as a leading manufacturer in the professional construction sector, specialising in restoration and refurbishment solutions, as well as innovative systems for new builds.

## **licataLab** Research and development

---

We are constantly committed to research and development, focusing on innovative technologies and skilled staff.

At our **licataLab** laboratories, we analyse raw materials and develop sustainable solutions that strike a balance between functionality, cost-effectiveness and environmental responsibility.

We work closely with specialist national and international bodies to obtain quality certification, ensuring that we provide our customers with reliable products that comply with regulations.

---

## Production and Quality

**LicataFIP Chemicals'** products and technologies for the construction and infrastructure sectors are developed in our laboratories. With decades of experience, we guarantee their quality using state-of-the-art production facilities to deliver long-lasting solutions.

## Our core values

At the heart of our mission lie three fundamental pillars: the transformative power of healthy and safe living environments; the belief that well-built structures are the cornerstone of community life and human relationships; and an unwavering commitment to safeguarding our architectural heritage for future generations. These are the principles that guide everything we do and every project we undertake.

- Research and Quality
- Advanced Technologies
- Vision and Values

# Shaping the future. Maintenance and repair of motorway viaducts

New Genoa-San Giorgio Viaduct,  
Genova

# Systems and solutions for tunnel maintenance

Restoration of the Dolomiti Tunnel  
Trentino Alto Adige

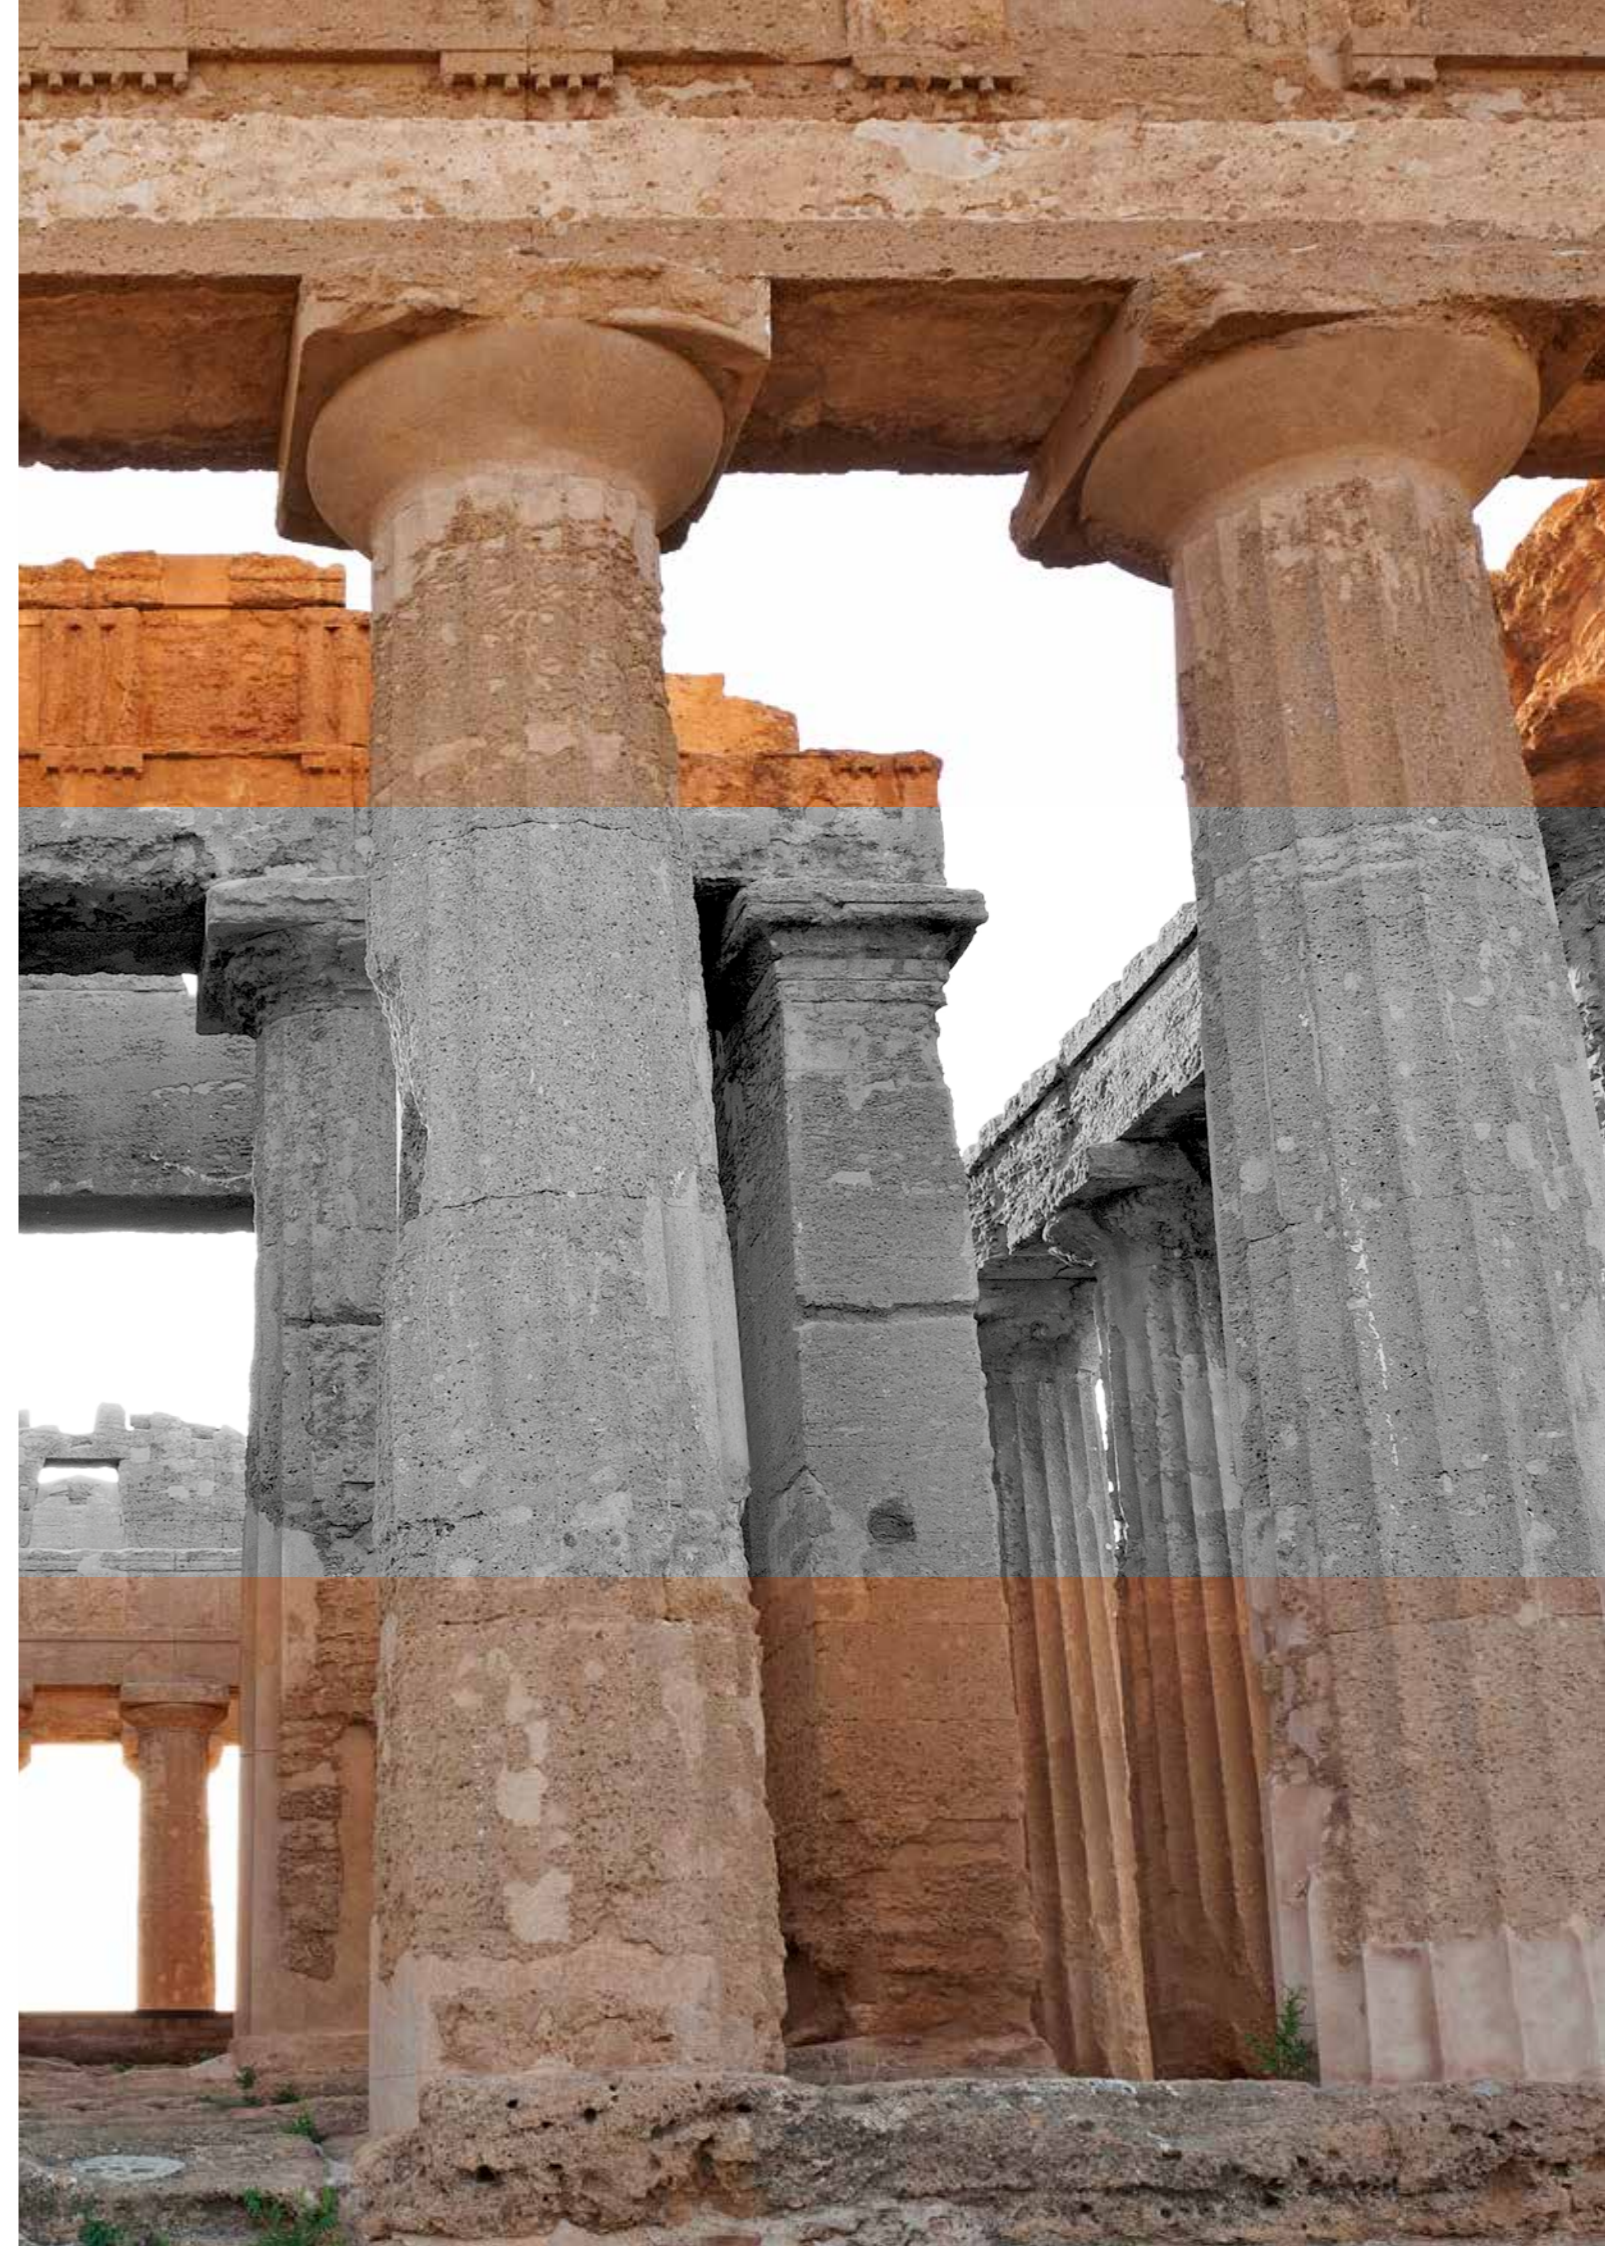

## Guardians of the past
